

Action Items

This document includes actions items listed at the 30th EVE meeting in Stockholm Sweden.

- 1) Persons with expertise in clean energy production wishing to join the group of experts on Clean Energy Production (CEP) to work on developing a method of stating energy consumption for upstream emission sources of electrified vehicles should contact the UNECE secretariat Mr. Francois Cuenot (francois.cuenot@un.org)
- 2) EVE IWG members should provide feedback by the next EVE teleconference (Early May) on their ability to do further validation work within new timeframe
 - a. Test labs to review validation data (k1, k2 factors, Tp1, Tp2 as necessary)
 - b. China to discuss on lab testing
- 3) EVE IWG to request gearbox efficiency method from ISO, or contact VDA for procedure on that
- 4) EVE IWG to provide comments to ISO on modifications to consider incorporating in ISO (agenda time for future meeting)
- 5) Japan to provide guidance on intake manifold and fuel flow rate
- 6) EVE IWG to begin drafting status report for power determination
- 7) EVE IWG to draft informal document (draft of formal) requesting mandate extension by May GRPE
- 8) Mike S. to summarize technologies tested and text matrix
- 9) Status report for durability drafting. Changes to include;
 - a. Kendelle A. to include recommendations and decisions from EVE 30 meeting
 - b. Mike S. to provide small section on durability definition
 - c. Kendelle A. to reference Japanese presentation from EVE 30 in status report
- 10) EVE IWG members to review and provide feedback on word version of status report (battery durability and energy consumption) by May 10th
- 11) EU Commission to provide revision of matrix by May GRPE meeting.
- 12) Matthias N. to investigate family concepts for power determination status report
- 13) Norbert K. to check into hosting EVE meeting in fall in South Korea
 - a. Note: Check into dates of other RDE, WLTP meeting dates in fall to coordinate EVE 32
- 14) Mike S. to follow up with Bryan Roos on data availability, particularly on k factors
- 15) Test labs to report back on tire losses and slippage methods if a reliable method to determine tire loss exists
- 16) EVE secretary to up invite EVE IWG to May teleconference and to poll on date
- 17) Mike S. to set up interim drafting group meeting between EVE 30 and EVE 31 in May (drafting group only)
