

## Pro & Con ideas on value description for CPA limitation

### Nominal value measured from glass edge

- ✓ Can be effective for projects before SOP
- ✓ Easy measurable on raw glass
- ✓ Easy approximate measurement on glass assembly
- ✓ Minimum CPA design in specific areas definable
- ✓ Definitive value can be decided either general or area specific
- ✓ ...
  
- CPA stripe design needed to achieve single value for all areas
- If clear glass area is covered with paint colour differences may occur
- No glass panel cost improvement herewith
- ...
  
- ❖ Additional costs to cover clear glass area between CPA stripes
- ❖ Additional costs for new CPA masking and releases for serial status
- ❖ ...

### % Value of single glass panel area

- ✓ Can be effective for projects before SOP
- ✓ Minimum CPA design in specific areas possible
- ✓ CPA stripe design is not required
- ✓ ...
  
- Value only with mathematical calculation
- No glass panel cost improvement herewith
- ...
  
- ❖ No definitive design of CPA areas definable
- ❖ ...
