

LowT 2018- Minutes TelCo

Date	March, 16 th (2018)
Title	Minutes of the 17 th TelCo- Low Temperature Task force
Document	LowT 17-02 - Draft MINUTES

The Chair (C. Astorga) welcomed the TF members, presented the agenda and briefly introduced the 17th TelCo.

Minutes from the latest f2f meeting were approved without further comment. File is now loaded in CIRCA-BC:

[2017_12_12&13-f2f 16th LowT meeting DRAFT minutes_v6 F-rev.docx](#)

Main topics discussed during the TelCo

S. Dubuc introduced a working document, which was prepared together with Peter Bonsack (BAFU-CH). The document was previously distributed by mail and contains work progress on GTR.

File name:

[14.03.2018 Items to be discussed, comments CH and DC-1.docx](#)

(Document will be circulated again with the minutes of the TelCo)

After the presentation of the document, the drafting coordinator asked the participants for contributions and comments. Comments should reach the drafting coordinator before to the next f2f on the 16th of April. Please consider to send your comments well in advance to allow the proper collection and analytical processing of all observations in due time.

GTR work progress and discussion will be among the main items in the agenda in f2f meeting. S. Dubuc together with Bonsack and G. D'Urbano will lead this part of the work from BAFU (CH).

Ichikawa-san mentioned that, due to the extension of the time available for the work during phase 2, it should not be necessary to rush and remarked that Japan, as CP, would not be ready to give conferred opinions on GTR issues in short time.

At this point, Chair shared the calendar of the WLTP IWG, which shows the extension (see below). In this calendar appears that a Technical report of the Low Temperature TF must be completed by the end of 2019.

All work of phase 2 must be completed by the end of 2020
