

Brief review of Power Determination GTR status

EVE interim teleconference

12 March 2020

Recent progress

- Completed series of 2-hour drafting sessions by teleconference:
 - Wed 12 February
 - Mon 24 February
 - Thu 27 February
 - Thu 5 March
 - Tue 10 March
- Held EVE teleconference on Power Determination: Thu 12 March
- Near-final draft submitted for translation: Tue 17 March
- Limited number of items marked in [square brackets] to resolve

Submitted GTR draft

- All known open issues have reached resolution within drafting group
 - See issue tracking spreadsheet (EVE-34-04e.xlsx)
- Submitted GTR is on the EVE 34 website (EVE-34-06e.pdf)
 - For an outline of the most significant changes from ISO 20762, see Section E.1
- Recent markup and comments may be seen in (EVE-34-07e.pdf)
- The GTR is currently divided into two sections:
 - Section I is the technical rationale and justification (p. 2-31)
 - It is intended that this will serve as the “Technical Report”
 - Read this section for background on the development of the current procedure
 - Some late test results from Canada and JRC will be included when available
 - Section II is the draft procedure (p. 32-53)
 - Section III and IV are Annex 1 and 2 (p. 54-60)

Next steps

- Revisions to [square bracket] items and other parts of the GTR may be provided in redline markup for consideration at GRPE
- EVE is encouraged to provide any additional input this week
- For this purpose, we will briefly review the [square bracket] items in EVE-34-06e.pdf
- Day 4 of EVE-34 has a time slot for final thoughts on the GTR
