Return or travel to Canada

COVID-19 emergency border measures have ended

For all travellers entering Canada by air, land or marine mode on or after October 1, 2022:

- Proof of COVID-19 vaccination is **not required**
- COVID-19 pre-entry and arrival tests are **not required**
- Quarantine after you enter Canada is **not required**
- Using [ArriveCAN](#) is **not required**
 - if you're flying into Toronto Pearson, Vancouver, Winnipeg or Montréal-Trudeau international airports, you can still use ArriveCAN to complete your [Advance CBSA Declaration](#) to save time upon arrival
- Pre-boarding tests for cruise passengers are **not required**
- As always, [travel documents](#) are required
- Health checks to board planes and trains are **not required**
- Wearing masks on planes and trains is **not required**
 - It's still strongly recommended that you wear a [high quality and well-fitted mask or respirator](#) while you travel

If you have [symptoms of COVID-19](#), you shouldn't travel to Canada.

If you feel sick or experience any symptoms of COVID-19 during your travel to Canada or upon arrival, you should:

- inform the flight attendant, cruise staff or a border services officer upon arrival. You may be referred to a Quarantine Officer for a health assessment and further direction.
- avoid taking public transportation
- check [provincial or territorial requirements](#) for what you need to do if you're symptomatic or have tested positive for COVID-19

Travelling in and out of Canada

- [International travel advice and advisories](#)

Wearing masks on planes and trains in Canada is **not required**.

- It's still strongly recommended that you wear a [high quality and well-fitted mask or respirator](#) while you travel

Situation in Canada

Remarks from the International Road Transport Union

17.04.2020

The Canadian Trucking Alliance (CTA) was informed on 15 April, by the Canadian Border Services Agency (CBSA), that the Public Health Agency of Canada (PHAC) is directing the agency, effective immediately, to implement a policy requiring all essential workers crossing the border to wear a non-medical mask or face covering and to provide drivers with a mask should they not have one.

CBSA informed CTA that no drivers will be turned away from entering Canada as a result of this policy and CBSA will be attempting to provide drivers with a mask, should they not have one.

The direction from the PHAC also states all travellers arriving in Canada will be required to wear a non-medical mask or face covering to proceed to their final destination, where they will isolate or quarantine.

Source: Canadian Trucking Alliance (CTA)

COVID-19: Travel, testing and borders

Return or travel to Canada

- [Use ArriveCAN to submit your travel plans \(mandatory\)](#)

[Steps for fully vaccinated travellers](#)

How to use ArriveCAN

Who needs to use ArriveCAN

All travellers, with limited exceptions, whether entering Canada by air, land, rail or marine vessel, **must** use ArriveCAN unless you're [exempt from this requirement](#) due to an accessibility need.

You'll need to submit your information within **72 hours** before your arrival to Canada.

If travelling by marine vessel transiting through to another country by air

If you don't submit your information through ArriveCAN

If you don't submit your information through ArriveCAN, you:

- may be denied boarding if arriving by air and may be denied entry into Canada if crossing at a land, rail or marine border crossing (if you are a foreign national travelling for discretionary purposes)

Canadian citizens, permanent residents, persons registered under the *Indian Act* and foreign nationals eligible to enter Canada under another entry exemption (such as foreign work, study, compassionate grounds) will not be denied boarding or entry, but you:

- won't be eligible for the fully vaccinated traveller exemption
- may face additional delays at the border for public health questioning
- may be subject to fines or enforcement action

Use ArriveCAN to submit:

Contact information and travel details
Vaccination information, pre-entry test results and travel history
Quarantine plan
Saved traveller feature

For fully vaccinated travellers

[Find out if you qualify for the fully vaccinated traveller exemption](#)

Include unvaccinated children or dependent adults in your submission regardless of their vaccination status

Essential travel requirements

As of January 15, 2022, essential travellers who were previously exempt must be fully vaccinated to get an ArriveCAN [receipt \(unless exempt from the vaccination requirement\)](#). All essential travellers must submit the following information into ArriveCAN:

- contact information
- travel details
- vaccination information, including which vaccine(s) received, including manufacturer, country received, date received, and upload proof of vaccination. Essential travellers exempt from the vaccination requirement still have to include their vaccination status.

Reusable receipt

Using ArriveCAN for someone else

If you're travelling with others, you can include multiple travellers in your ArriveCAN submission.

Including multiple people in your submission
If you're not the traveller

Getting your ArriveCAN receipt

Once you submit your information through ArriveCAN, a receipt will be displayed and emailed to you.

ArriveCAN won't confirm exemptions from public health requirements. An ArriveCAN receipt shows that you've successfully provided your information. **It doesn't validate your eligibility to enter Canada, vaccination status, or essential travel status.** Your exemptions from public health requirements and/or essential travel status will be determined by a border services officer.

How to use the ArriveCAN receipt

Preparing your Advance CBSA Declaration (only available at the Vancouver International Airport (YVR) and Toronto Pearson International Airport (YYZ))

You can now save time at the airport by using the kiosk to answer customs and immigration questions and sending them to the Canada Border Services Agency **before** your flight lands in Canada. The advance declaration is optional.

This feature is only available to travellers who use the web version of [ArriveCAN](#) (**not** the mobile app), and whose **first point of arrival** in Canada is the Vancouver International Airport (YVR) or Toronto Pearson International Airport (YYZ). This feature will be expanded to other airports in the future.

How to submit your [Advance CBSA Declaration](#).

You may [contact us](#) if you have any issues preparing your Advance CBSA Declaration.

If your travel details change before you enter Canada

If you need to edit your information and have an ArriveCAN receipt, you need to start over and create a new submission. ArriveCAN will clear your previous information.

After you've entered Canada

If a border services officer confirms that you qualify as a [fully vaccinated traveller](#), you may still be subject to random testing on arrival. However, you won't report your results through ArriveCAN. Follow the instructions given to you by the border services officer. Please [register in advance for your arrival test](#). It will speed up your testing experience.

ArriveCAN notifications after you've entered Canada
If you qualified for the fully vaccinated traveller exemption
If you didn't qualify for the fully vaccinated traveller exemption
If you submitted information for an unvaccinated traveller

How your ArriveCAN information is used and disclosed

Get help with ArriveCAN

Find out how to create your ArriveCAN account, troubleshoot problems and contact us on the [ArriveCAN help page](#).

Temporary border restrictions and measures to address COVID-19 Omicron variant of concern

In effect: There are new requirements for all **fully vaccinated travellers** who have been in any country other than Canada and the United States in the 14 days prior to entry to Canada. Fully vaccinated travellers who are selected for arrival testing must [quarantine in a suitable place](#) until they receive a negative test result. The Government of Canada is increasing the number of fully vaccinated travellers being selected for testing to reach 100% of vaccinated travellers in the coming weeks.

Requirements for [unvaccinated travellers](#) remain unchanged.

[News release](#)

For travellers who have been in the following countries within 14 days prior to arrival in Canada: Botswana, Egypt, Eswatini, Lesotho, Malawi, Mozambique, Namibia, Nigeria, South Africa, Zimbabwe:

- Foreign nationals are not permitted entry into Canada
- Canadian citizens, permanent residents, people with status under the *Indian Act*, are subject to enhanced pre-entry and arrival testing, screening, and quarantine measures
- Travellers (fully vaccinated and unvaccinated) arriving by air are required to stay at a designated quarantine facility while they await their arrival test result

To limit the further spread of coronavirus in Canada, travel restrictions are in place across all border crossings.

Answer a few questions to find out if you may be allowed to enter Canada.

<https://travel.gc.ca/travel-covid/travel-restrictions/wizard-start>

30.11.2021

Government of Canada introduces additional measures to address COVID-19 Omicron variant of concern

From: [Public Health Agency of Canada](#)

On November 26, 2021, the World Health Organization classified B.1.1.529 as a variant of concern called Omicron. Since then it has been found in a number of countries and regions, including the confirmation of several travel-related cases in Canada.

That is why today, the Minister of Health, the Honourable Jean-Yves Duclos, the Minister of Transport, the Honourable Omar Alghabra, and the Honourable Marco Mendicino, Minister of Public Safety, announced additional border measures to reduce the risk of the importation and transmission of COVID-19 and its variants in Canada related to international travel.

Based on data from ongoing surveillance efforts and the latest public health advice, the Government of Canada is expanding the list of countries with entry prohibitions [originally announced on November 26, 2021](#), to include Egypt, Nigeria and Malawi. Effective tomorrow, foreign nationals who have been in any of these countries within the previous 14 days will not be permitted entry into Canada:

- Botswana
- Egypt;
- Eswatini;
- Lesotho;
- Malawi;
- Mozambique;
- Namibia;
- Nigeria;
- South Africa; and
- Zimbabwe.

Canadian citizens, permanent residents and people with status under the *Indian Act*, regardless of their vaccination status or having had a previous history of testing positive for COVID-19, who have been in any of these 10 countries in the previous 14 days, will be subject to enhanced pre-entry and arrival testing, screening, and quarantine measures.

Moving forward, border testing surveillance will be adjusted based on the latest available evidence to further reduce the risk of importation of this variant. In the coming days, all fully vaccinated travellers arriving by air from departure points other than the United States will be subject to arrival testing. Fully vaccinated travellers will be required to quarantine while they await the results of their arrival test.

Unvaccinated travellers, with right of entry to Canada, will continue to be tested on arrival and day 8 and quarantine for 14 days. However, those arriving by air will now be required to stay in a designated quarantine facility or other suitable location while they await the result of their on arrival test.

The Government of Canada will continue to assess the evolving situation, monitor case data, and adjust border measures as required. The Government of Canada is working collaboratively with its provincial and territorial counterparts. While the impact of all variants continues to be monitored in Canada, vaccination in combination with public health and individual measures, is working to reduce the spread of COVID-19 and its variants.

Quotes

"Our government continues to take unprecedented and swift action to protect the health and safety of Canadians as we introduce new robust, science-based measures to prevent COVID-19 variants of concern from being spread in Canada. The new requirements announced today are another layer of protection to to safeguard Canadians' health."

The Honourable Omar Alghabra
Minister of Transport

"We are taking quick action at our borders to mitigate travel related importations of the Omicron variant. While our monitoring systems are working well, we now know that the Omicron variant is present in Canada. We need to remain vigilant in our own actions. Vaccination and simple public health measures such as masking and limiting the number of persons we interact with slow down transmission, reduce hospitalization and death, and protect our health systems from being overwhelmed. We must all continue to do our part to protect all people in Canada."

The Honourable Jean-Yves Duclos
Minister of Health

"While Canadians may be concerned about the most recent variant, be assured we will continue to enforce stringent measures at our borders to protect Canadians from COVID-19. Canada Border Services Agency officers will apply all measures deemed necessary to comply with entry requirements. I ask all Canadians to be patient as they wait to cross the border and check to ensure you have complied with all entry requirements before arriving at the Canadian border."

The Honourable Marco Mendicino
Minister of Public Safety

Quick facts

- Canadian citizens, permanent residents, and people with status under the *Indian Act* who have been in these countries—Botswana, Egypt, Eswatini, Lesotho, Malawi, Mozambique, Namibia, Nigeria, South Africa, and Zimbabwe—in the 14 days before travel to Canada will be required to:
 - Obtain, within 72 hours of departure, a valid negative COVID-19 molecular test in a third country before continuing their journey to Canada,
 - Complete testing upon arrival to Canada, regardless of their vaccination status or having had a previous history of testing positive for COVID-19,
 - Required to complete a test on Day 8 after arrival and quarantine for 14 days.
 - Those arriving by air will be required to stay in a designated quarantine facility while they await their arrival test result. They will be permitted onward travel once they have received a negative arrival test result.
 - Those arriving by land may be allowed to proceed directly to their suitable quarantine location. If they do not have a suitable and robust quarantine plan—where they will not have contact with anyone with whom they haven't travelled with—or do not have private transportation to their place of quarantine, they will be directed to stay at a designated quarantine facility.
- There will be increased scrutiny of quarantine plans for travellers from these countries and rigorous monitoring to ensure travellers are complying with quarantine measures. Further, PHAC is contacting travellers, regardless of their vaccination status or having had a previous history of testing positive for COVID-19, who have entered Canada from these countries in the past 14 days to direct them to be tested and to quarantine while they wait for the results of those tests.
- As of November 30, 2021, six cases of the Omicron variant of concern in Canada have been confirmed.
- In February 2021, the Government of Canada increased its capacity to find and track variants of concern in Canada by investing \$53 million in an integrated Variants of Concern Strategy. The Government of Canada is working with provinces and territories and the Canadian COVID Genomics Network and the Canadian Institutes of Health Research on surveillance, sequencing and scientific efforts to detect known and potentially emerging COVID-19 virus variants of concern.
- As of today, vaccination is required for travel within and out of Canada. A valid COVID-19 molecular test is no longer accepted as an alternative to vaccination unless travellers are eligible for one of the limited exemptions, such as a medical inability to be vaccinated. Travellers should contact their airline or railway company to obtain the necessary form and submit it in accordance with their carrier's approval process. Effective today, fully vaccinated Canadian citizens, permanent residents or individuals registered under the *Indian Act* who depart and re-enter Canada by land or by air within 72 hours of leaving the country do not have to provide a pre-entry molecular test result.
- [ArriveCAN](#) remains mandatory for everyone, regardless if travellers enter by land/air/marine or how long they were away from Canada. **All travellers** must submit their mandatory information in [ArriveCAN](#) (free mobile app or website), including proof of vaccination in English or French and a quarantine plan **before** arriving in Canada.

Find out if you can enter Canada

To limit the further spread of coronavirus in Canada, travel restrictions are in place across all ports of entry.

a Canadian citizen (including dual citizens), a permanent resident of Canada, a person registered under the *Indian Act*, or a protected person (refugee status)

a foreign national (including a United States citizen)

See the rules used to determine if you can enter Canada

This tool has been designed to give you an answer for the **majority of reasons** for entry into Canada. The rules are different for Canadians and foreign nationals.

Canadian citizens (including dual citizens), permanent residents, persons registered under the *Indian Act*, and protected person

Canadians with symptoms

If you're a Canadian citizen, a permanent resident of Canada, a person registered under the *Indian Act*, or protected person, and you have symptoms consistent with COVID-19, you should be able to enter Canada **by land or by sea**. You will [not be able to board a public flight](#) and enter by air if you have symptoms.

You must have a [suitable place and plan to isolate](#). This is mandatory.

Canadians without symptoms

If you're a Canadian citizen, a permanent resident of Canada, a person registered under the *Indian Act*, or protected persons, and you don't have symptoms consistent with COVID-19, you are able to enter Canada.

Unless you are exempt, you will need to follow the testing requirements for your method of entry:

- [Flying to Canada: COVID-19 testing for travellers](#)
- [Driving to Canada: COVID-19 testing for travellers](#)

You must have a [suitable place and plan to quarantine](#). This is mandatory, unless your [reason for entry is considered quarantine exempt](#).

Provincial and territorial requirements

You may have to comply with additional quarantine requirements make declarations of your arrival or other restrictions depending on which [province or territory](#) is your final destination.

Dual Canadian citizens

If you're a **dual Canadian citizen**, you can only enter Canada with a:

- [valid Canadian passport](#) or
- [special authorization](#)

Foreign nationals coming from the U.S. (including connections, so long as you enter Canada from the U.S.)

Temporary border restriction implemented on March 21, 2020 continues.

Foreigners with symptoms

If you're a foreign national and you have symptoms consistent with COVID-19, you will not be able to enter Canada.

Foreigners without symptoms

You must have a [suitable place and plan to quarantine](#). This is mandatory, unless your [reason for entry is considered quarantine exempt](#). If you do not have a plan, you may be denied entry into Canada.

Unless you are exempt, you will need to follow the testing requirements for your method of entry:

- [Flying to Canada: COVID-19 testing for travellers](#)
- [Driving to Canada: COVID-19 testing for travellers](#)

No entry for optional reasons

A foreign national will be denied entry into Canada for discretionary (optional) reasons such as:

- leisure, tourism, visiting friends
- social gatherings, weddings
- being a property owner in Canada

Entry for non-discretionary (non-optional) reasons

Foreigners entering from the U.S may only enter to:

Reunite with family in Canada
Travel for an essential or not discretionary (optional) reason

Transiting through Canada

You may be permitted to transit through Canada to reach another country.

For more information about flights, see [Transit to another country by air](#).

Alaska and the rest of the United States

You will likely be permitted to transit across Canada, but there are several requirements to follow.

For more information, see [Transit between Alaska and the rest of the United States](#)

Canadian waters

You cannot enter Canadian waters for optional reasons. You may still navigate through international or Canadian waters while in transit.

For more information, see [Transit through Canadian waters](#)

Provincial and territorial requirements

You may have to comply with additional quarantine requirements, make declarations of your arrival or other restrictions depending on which [province or territory](#) is your final destination.

Foreign nationals who are coming directly from another country

Temporary border restriction implemented on March 21, 2020 continues.

Foreigners with symptoms

If you're a foreign national and you have symptoms consistent with COVID-19, you will not be able to enter Canada.

Foreigners without symptoms

You must have a [suitable place and plan to quarantine](#). This is mandatory, unless your [reason for entry is considered exempt from quarantine](#). If you do not have a plan, you may be denied entry into Canada.

Unless you are exempt, you will need to follow the testing requirements for your method of entry:

- [Flying to Canada: COVID-19 testing for travellers](#)
- [Driving to Canada: COVID-19 testing for travellers](#)

No entry for optional reasons

A foreign national will be denied entry into Canada for any optional reason such as:

- leisure, tourism, visiting friends
- social gatherings, weddings
- being a property owner in Canada

Entry is permitted only under certain travel exemptions

Even if you believe your reason for travel is an essential visit, you may only enter Canada to:

Reunite with family in CanadaTravel for a specific purpose that is permitted (travel exemption)

Transiting through Canada

You may be permitted to transit through Canada to reach another country.

For more information about flights, see [Transit to another country by air](#).

Canadian waters

You cannot enter Canadian waters for optional reasons. You may still navigate through international and Canadian waters while in transit.

For more information, see [Transit through Canadian waters](#)

Provincial and territorial requirements

You may have to comply with additional quarantine requirements, make declarations of your arrival or other restrictions depending on which [province or territory](#) is your final destination.

Disclaimer: In addition to the temporary entry restriction in place due to COVID-19, foreign nationals must meet the entry requirements under the *Immigration and Refugee Protection Act* and provide appropriate travel and immigration documentation as necessary.

Select a destination

Canada

latest update

Latest changes

Canada specified that all passengers, regardless of COVID-19 vaccination status, could be subject to a COVID-19 test upon arrival. Please see item 4.

Current regulations

1. Passengers and airline crew must have a COVID-19 vaccination certificate uploaded in ArriveCAN showing that they were fully vaccinated at least 15 days (day of vaccination plus 14 days) before arrival. The certificate must be in English, French or accompanied by a certified English or French translation. Vaccines accepted are: AstraZeneca (Covishield), AstraZeneca (SK Bioscience), AstraZeneca (Vaxzevria), Covaxin, Covovax, Janssen, Medicago Coviflex, Moderna (Spikevax), Novavax (Novavax), Pfizer-BioNTech (Cominaty), Sinopharm or Sinovac. A combination of vaccines is accepted.

- This does not apply to:
 - nationals of Canada;
 - permanent residents of Canada;
 - persons registered under Canada's Indian Act with the Certificate of Indian Status (CIS) or the Secure Certificate of Indian Status (SCIS);

Restriction level	Partially Restrictive
COVID-19 test	YES
Entry restrictions	NO
Flights suspended	NO
Quarantine	YES
Restrictions lifted	Restrictions in place

- passengers with an authorization from the Public Health Agency of Canada (PHAC) for compassionate entry;
- passengers with a Canadian Refugee Travel Document or a Single Journey Document for Resettlement to Canada;
- passengers younger than 18 years traveling with their vaccinated parents/guardians;
- passengers with an application for permanent residence. They must have a written notice issued under the Immigration and Refugee Protection Act;
- nationals of Ukraine and their immediate family members with a Canadian Temporary Resident Permit or a Canadian Temporary Resident Visa.

More exemptions can be found at <https://travel.gc.ca/travel-restrictions/exceptions>

2. Passengers must have:

- a negative molecular COVID-19 test taken outside of Canada at most 72 hours before departure of the last direct flight to Canada. Tests accepted are: CRISPR, Ct, detection of the E gene, detection of the N gene, detection of ORF1a/b, detection of the RdRp gene, detection of the S gene, ddPCR, isothermal amplification, LamiPORE, NAAT, NGS, PCR, qPCR, RNA, RT-LAMP, RT-PCR, sequencing and WGS; or
- a negative COVID-19 antigen test taken at most one day before departure of the last direct flight to Canada.

More details can be found at <https://travel.gc.ca/travel-restrictions/exceptions>

- This does not apply to:
 - passengers younger than 5 years;
 - passengers between 5 and 11 years traveling with their fully vaccinated parents/guardians;
 - passengers with a COVID-19 vaccination certificate showing that they were fully vaccinated at least 15 days (day of vaccination plus 14 days) before arrival. The certificate must be in English, French or accompanied by a certified English or French translation. Vaccines accepted are: AstraZeneca (Covishield), AstraZeneca (SK Bioscience), AstraZeneca (Vaxzevria), Covaxin, Covovax, Janssen, Medicago Coviflex, Moderna (Spikevax), Novavax (Novavax), Pfizer-BioNTech (Cominaty), Sinopharm or Sinovac. A combination of vaccines is accepted;
 - passengers with a positive molecular COVID-19 test taken at least 10 days and at most 180 days before departure of the last direct flight to Canada. Tests accepted are: CRISPR, Ct, detection of the E gene, detection of the N gene, detection of ORF1a/b, detection of the RdRp gene, detection of the S gene, ddPCR, isothermal amplification, LamiPORE, NAAT, NGS, PCR, qPCR, RNA, RT-LAMP, RT-PCR, sequencing and WGS;

More exemption can be found in <https://travel.gc.ca/travel-restrictions/exceptions>

3. Passengers and airline crew must submit their information electronically, at most 72 hours before arrival, through the ArriveCAN app or the website <https://www.canada.ca/en/public-health/services/arrivecan.html> or <https://www.canada.ca/en/public-health/services/arrivecan.html>. Passengers must present an ArriveCAN receipt before boarding.

4. Passenger could be subject to a COVID-19 molecular test upon arrival. Details can be found at <https://travel.gc.ca/travel-restrictions/exceptions>

5. Passengers could be subject to quarantine for 14 days. Details can be found at <https://travel.gc.ca/travel-restrictions/quarantine-checklist>

- This does not apply to:
 - passengers younger than 12 years traveling with their fully vaccinated parents/guardians;
 - passengers with a COVID-19 vaccination certificate showing that they were fully vaccinated at least 15 days (day of vaccination plus 14 days) before arrival. The certificate must be in English or French or be accompanied by a certified translation to English or French;
 - Vaccines accepted are: AstraZeneca (Covishield), AstraZeneca (SK Bioscience), AstraZeneca (Vaxzevria), Covaxin, Covovax, Janssen, Medicago Coviflex, Moderna (Spikevax), Novavax (Novavax), Pfizer-BioNTech (Cominaty), Sinopharm or Sinovac. A combination of vaccines is accepted;
 - More details can be found at <https://travel.gc.ca/travel-restrictions/exceptions/covid-19-vaccinated-travellers-entering-canada>

02.10.2020

Government introduces new border measures to protect Canadian public health, provides update on travel restrictions

Quick facts

- While Canadian citizens and Canadian permanent residents can travel to Canada, foreign nationals are subject to the travel restrictions.
- The new measure for extended family members complements the updated rules for immediate family members [announced on June 8, 2020](#), and will help families in Canada reunite with more of their loved ones.
- All travellers must quarantine for 14 days upon arrival in Canada, unless they are exempt. Travellers may also seek approval for limited release from mandatory quarantine for compassionate reasons in specific situations where respecting the 14day mandatory quarantine period is not feasible, such as visiting a loved one who is critically ill.
- All travellers to Canada are now required to provide specific information after entry into Canada, including contact information. They may also provide updates on symptoms through selfassessment during their quarantine period. The ArriveCAN app is the recommended option for providing this information.
- Travellers flying to Canada must pass a health check conducted by airlines before they will be allowed to board their flight. Upon arrival in Canada, a traveller's health and ability to quarantine will be assessed before they leave the port of entry.
- Any foreign national showing signs or symptoms of COVID19 will not be allowed to enter Canada. A border services officer will determine if a foreign national can enter the country.

Coronavirus disease (COVID-19): Travel restrictions, exemptions and advice

On this page

- [Travellers entering Canada](#)
 - [ArriveCAN app](#)
 - [Border restrictions](#)
 - [Exemptions to border restrictions](#)
 - [Mandatory quarantine or mandatory isolation](#)
 - [Compliance and enforcement](#)
- [Travellers within Canada](#)
- [Travellers departing Canada](#)
 - [Protect yourself and others](#)
 - [Leaving Canada while in mandatory quarantine](#)
 - [Avoid all travel on cruise ships outside Canada](#)
- [Non-medical masks or face coverings while travelling](#)

Travellers entering Canada

To limit the spread of COVID-19, travellers entering Canada must follow the rules set out by the [emergency orders](#) under the *Quarantine Act*.

No one should travel when sick. Commercial airline restrictions may also prevent you from boarding your plane if you're sick. However, Canadians, persons with status under the *Indian Act* and permanent residents who have COVID-19 symptoms are allowed to return to Canada.

When entering Canada, you'll be:

- asked if you have a cough, fever or difficulty breathing
- required to acknowledge that you must:
 - quarantine for 14 days if you don't have symptoms **or**
 - isolate for 14 days if you have symptoms
- asked if you have a suitable place to isolate or quarantine, where:
 - you'll have access to basic necessities, including water, food, medication and heat during the winter months
 - you won't have contact with people who:
 - are 65 years or older
 - have underlying medical conditions
 - have compromised immune systems
 - you won't be in a group or community living arrangement
- given instructions about the actions you must take under the emergency order and the penalties for non-compliance

Travellers entering Canada must:

- provide traveller contact information through:
 - the [ArriveCAN mobile app](#) **or**
 - an [accessible web-based form](#) **or**
 - a paper form
- undergo screening by a border official
- answer any relevant questions:
 - when you arrive in Canada
 - during your 14-day period while in quarantine or isolation

Government of Canada representatives at Canadian ports of entry will:

- administer the emergency orders on behalf of the Public Health Agency of Canada
- assess your potential risks to public health under the *Quarantine Act*
- determine if you:
 - have suitable plans for [quarantine or isolation](#)
 - need to be transferred to a designated quarantine facility, if no other suitable options are available
 - have no symptoms of COVID-19 and can continue domestic travel to your place of quarantine

The information border officials collect helps the Public Health Agency of Canada with its [compliance and enforcement efforts](#). Providing false or misleading information is an offence under the *Quarantine Act* and can result in fines and potentially prison time.

ArriveCAN app

Use this mobile app to speed up your arrival process in Canada and spend less time with border and public health officers. Submit your information easily and securely using the app within **48 hours before** arriving in Canada. The app helps you to:

- provide mandatory information that's required for entry into Canada
- reduce your wait time and points of contact at the border
- provide the Government of Canada with voluntary updates on your quarantine compliance and the development of any symptoms during the 14 days after arriving in Canada

Download the ArriveCAN app ([iOS](#), [Android](#) or [web format](#)). Make sure you have the official version by downloading it [here](#).

Border restrictions

If you're a foreign national (not a Canadian citizen or a permanent resident of Canada), you won't be able to enter Canada if you have [COVID-19 symptoms](#).

There are currently border restrictions for discretionary (optional) travel to Canada:

- at the [Canada-U.S. border](#)
- from [any country other than the U.S.](#)

Discretionary travel includes, but is not limited to, tourism, recreation and entertainment.

If a traveller's entry is permitted, they'll be subject to [mandatory quarantine](#) for 14 days.

Exemptions to border restrictions

There are no exemptions to border restrictions for compassionate reasons, such as visiting a critically ill loved one or attending a funeral.

You'll only be considered for an exemption to border restrictions at Canada's ports of entry if:

- you don't have symptoms of COVID-19
- your reason for travel is:
 - included in the conditions outlined in the [emergency orders](#) **or**
 - on the list of [group exemptions from entry prohibitions](#) **or**
 - on the list of [group exemptions quarantine requirements](#)

You don't require an interpretive letter from the Public Health Agency of Canada in order to be exempted from an emergency order.

If you've requested an interpretive letter for a future travel exemption, this letter would be taken into account. However, it wouldn't be considered a final decision for entry or for quarantine requirements.

A government representative at the border will determine if your reason for travelling to Canada can be considered for exemption under the emergency orders.

Foreign nationals arriving from the U.S. may be able to enter Canada for non-discretionary (non-optional) travel purposes.

Foreign nationals arriving from countries other than the U.S. may also be allowed to enter Canada. However, their travel must be non-discretionary (non-optional) and fall under exemptions set out in the emergency order. For example:

- [an immediate family member](#) of a Canadian citizen or permanent resident who is travelling to **be with** an immediate family member **and** is planning to stay for a period of at least 15 days
 - foreign nationals who are allowed into Canada under this exemption **must quarantine** for 14 days

Being exempt from border restrictions does **not** mean you're exempt from other requirements, including:

- mandatory [quarantine](#)
- any additional public health requirements of the province or territory where you'll be quarantining and staying while in Canada

In some cases, your reason for travelling may be considered essential by a province, territory or under Canada's [National Strategy for Critical Infrastructure](#). However, you'll only be given an [exemption](#) by the Government of Canada if your reason for travel is considered essential under the *Quarantine Act's* emergency orders.

Foreign nationals who meet an exemption to the border restrictions must still present the appropriate travel documents at the border. This includes citizenship documents or work permits. Government representatives will make the final decision on your entry to Canada at the port of entry.

For more information on the restrictions to enter Canada and the exemptions, consult the [Canada Border Services Agency](#).

Mandatory quarantine or mandatory isolation

Before considering travelling, all travellers arriving in Canada must plan for their mandatory 14-day quarantine period, which starts on the date they arrive. Government of Canada representatives will conduct health screenings at the time of entry to Canada and let you know if you need to quarantine **or** isolate.

If **you don't have COVID-19 symptoms**, you must **quarantine** for 14 days while you're still at risk of developing symptoms and infecting others.

- [Quarantine instructions for travellers without symptoms of COVID-19 returning to Canada](#)
- [Quarantine instructions for Canadians crossing the border daily to attend school in the U.S.](#)

If you **have COVID-19 symptoms**, you must **isolate** for 14 days. The only people who may enter Canada if they have COVID-19 or any [symptoms of COVID-19](#) are:

- Canadians
- persons with status under the *Indian Act*
- permanent residents

[Isolation instructions for travellers with COVID-19 symptoms returning to Canada](#)

All travellers entering Canada, whether in mandatory quarantine or isolation, must:

- arrange for a suitable place to quarantine or isolate, within your financial means
- go directly to your place of quarantine or isolation, without stopping anywhere
- wear a [non-medical mask or face covering](#) while travelling to the place where you'll quarantine or isolate
- stay at your place of quarantine or isolation for 14 days (only leave to seek medical assistance if needed)
- not have any guests
- monitor your health for fever and a cough, or fever and difficulty breathing
- follow all other guidance provided by your local public health authority

You're strongly urged to make housing arrangements for quarantine or isolation before you arrive in Canada. In most cases, this can be in your own home or in the same place you're visiting in Canada.

If this isn't possible, you should consider making alternative arrangements that are within your own financial means. A suitable place is one where you:

- won't have contact with people who are vulnerable, such as those who:
 - are 65 years or older
 - have underlying medical conditions
 - have compromised immune systems
- aren't in a group living environment
- can stay for at least 14 days (and possibly longer)
- have access to basic necessities, including water, food, medication and heat during the winter months

Exceptions to staying with a vulnerable person include if:

- they're a consenting adult
- they're either the parent or the minor in a parent-minor relationship

Before you travel, you must plan to quarantine or isolate in a suitable place. If you don't, you may be assessed further. If you can't quarantine in your own home, consider other options within your financial means, such as:

- hotel
- motel
- other paid housing
- friends or family, as long as you won't expose anyone who:
 - is not part of your travel group
 - is at risk of more severe outcomes of COVID-19

If no other options are available, travellers may be referred to a designated quarantine facility as a last resort. This decision will be made by a government representative at the border.

After you arrive in Canada, a representative of the Government of Canada will call you to monitor compliance with your mandatory quarantine or isolation. We ask that you please answer calls from **1-888-336-7735**.

Travellers who need medical testing or treatment while in quarantine or isolation

If you need to seek testing or medical treatment, you must:

- immediately return to your place of quarantine or isolation location afterwards
- wear a non-medical mask or face covering while in transit

We also recommended that you contact your local public health authority and follow any additional instructions they provide.

Travellers with symptoms (mandatory isolation)

No one should travel when sick. Commercial airline restrictions may also prevent you from boarding your plane if you're sick. However, Canadians, persons with status under the *Indian Act* and permanent residents who have COVID-19 symptoms are allowed to return to Canada.

If you arrive in Canada with symptoms of COVID-19, let a border official know. A Government of Canada representative will then be contacted to assess your situation. If you need it, they'll help you get medical care.

Foreign nationals won't be allowed to enter Canada if they have COVID-19 or any symptoms of COVID-19.

In addition to the steps described above for [mandatory quarantine or isolation](#), if you have symptoms of COVID-19 you must also:

- use private transportation (such as your own vehicle) to get to your place of isolation
- wear a suitable non-medical mask or face covering while in transit
- practise physical distancing at all times
- not go outside, including private outdoor spaces, like backyards or balconies, at your place of isolation

If your symptoms get worse during your isolation period, contact your local public health authority and follow their instructions.

[Isolation instructions for travellers with COVID-19 symptoms returning to Canada](#)

Travellers without symptoms (mandatory quarantine)

If you're in mandatory quarantine and have no COVID-19 symptoms, you may use a private outdoor space if your place of quarantine has one. This means one that's not shared with anyone else.

Avoid contact with those who:

- are 65 years or older
- have underlying medical conditions
- have compromised immune systems

You may only quarantine with somebody from the above group if:

- they consent to the quarantine or are the parent or minor in a parent-minor relationship
- you complete a form provided by a government representative at the port of entry explaining the consent and receive authorization to proceed

If you develop COVID-19 symptoms within your 14-day quarantine period:

- isolate yourself from others immediately
- contact your [public health authority](#) and follow their instructions
- extend your quarantine to 14 days from the day your symptoms developed

[Quarantine instructions for travellers without symptoms of COVID-19 returning to Canada](#)

Exemptions to mandatory quarantine

There are **no** exemptions from mandatory quarantine for:

- compassionate reasons, such as visiting a critically ill loved one or attending a funeral
- travellers entering Canada who have tested negative for COVID-19
 - this is because a negative [test for COVID-19](#) doesn't prove that a traveller is COVID-19 free
- travellers entering Canada who have recovered from COVID-19
 - this is because there's potential risk of re-infection and it's not yet certain how long the virus is contagious

If you don't have symptoms of COVID-19 and you're a member of one of the exempt classes of persons listed in the [mandatory isolation order](#), then you don't have to meet federal quarantine requirements, but are required to respect the intent of the order in addition to any provincial and local requirements. This exemption from federal quarantine requirements includes, with conditions, persons who perform an [essential job or function, as described in the order](#).

You don't require an interpretive letter from the Public Health Agency of Canada in order to be exempted from an emergency order.

If you've requested an interpretive letter for a future travel exemption, this letter would be taken into account. However, it wouldn't be considered a final decision for entry or for quarantine requirements.

A government representative at the border will determine if your reason for travelling to Canada can be considered for exemption under the emergency orders.

If you're exempt from the 14-day quarantine requirement, you must still:

- monitor your health for COVID-19 symptoms
- wear a non-medical mask or face covering while in public settings if physical distancing can't be maintained
- follow public health guidance and prevention measures from your local health authority and your employer

Isolate yourself from others right away if you develop [COVID-19 symptoms](#) and contact your local public health authority for further instruction.

Employers of exempt workers should conduct active daily monitoring of their staff for COVID-19 symptoms, checking for cough, fever or shortness of breath. Use the [risk assessment tool for workplaces and businesses](#) for more guidance.

Compliance and enforcement

Violating any instructions provided to you when you entered Canada or failing to provide accurate information is an offence under the *Quarantine Act* and could lead to up to:

- 6 months in prison **and/or**
- \$750,000 in fines

If you choose to break your mandatory quarantine or isolation, resulting in the death or serious bodily harm to another person, you could face:

- a fine of up to \$1,000,000 **or**
- imprisonment of up to 3 years **or**
- both

The *Contraventions Act* has been changed to give police (including the RCMP, provincial and local police) more power to enforce the *Quarantine Act*. They can issue tickets to people who don't comply with the act or the emergency orders. Fines range from \$275 to \$1,000.

Travellers within Canada

As of March 30, 2020, all airline passengers in Canada will be subject to a health check prior to boarding. You won't be able to board if you:

- show any symptoms of COVID-19
- are subject to a provincial or local public health order
- have been refused boarding in the past 14 days due to a medical reason related to COVID-19

If you weren't allowed on a flight because you had COVID-19 symptoms, you can't board any other flight until:

- 14 days have passed and you no longer have symptoms **or**
- you present a medical certificate confirming that your symptoms aren't related to COVID-19

Travellers within Canada may be subject to additional provincial, territorial and local public health measures at your final destination. In addition, they may be exempted from provincial or territorial border restrictions within Canada if their reason for travelling within Canada is to provide support to a business that's considered essential:

- by Public Safety Canada
- within a province or territory

Travellers departing Canada

Canadian citizens and permanent residents are advised to **avoid all non-essential travel outside of Canada** until further notice to limit the spread of COVID-19.

The best way to protect yourself, your family and those most at risk of severe illness from COVID-19 in our communities is to choose to stay in Canada. Contact your airline or tour operator to determine options for cancelling or postponing your trip.

Many countries have put in place travel or border restrictions, such as movement restrictions and quarantines. Many airlines have reduced or suspended flights and many airports have closed.

These restrictions are changing quickly and may be imposed by countries with little warning. Your travel plans may be severely disrupted. Should you choose to take non-essential travel outside Canada, you may be forced to remain outside of Canada longer than expected.

It's important to remember that if you choose to travel abroad:

- your trip may become much longer than you planned
- you may have reduced access to quality health care
- you could be subject to the measures of other countries

If you're still considering travel outside of Canada, you should:

- understand the risks to your safety and security abroad
- check the [pandemic travel health notice](#) before travelling
- know the health risks and travel restrictions and requirements for your destination
- make sure you have enough money and necessities, including medication, in case your travel is disrupted

Protect yourself and others

If you must travel or are already outside Canada, get the latest [advice and information for your safety and security](#).

During your trip:

- wear a non-medical mask or face covering when physical distancing can't be maintained
- cough and sneeze into a tissue or the bend of your arm
- be aware of the local situation and follow local public health advice
- take [precautions against respiratory illnesses](#), which includes:
 - avoiding contact with sick people
 - avoiding [large crowds](#) or crowded areas
- [wash your hands](#) often with soap under warm running water for at least 20 seconds
 - if none is available, use hand sanitizer containing at least 60% alcohol

If you feel sick during your flight or upon arrival:

- seek medical attention
- look for messaging on airport screens to guide you
- inform the flight attendant or a border services officer

When travelling outside Canada, expect increased health screening measures at points of entry for international destinations, including airports and land borders. Local authorities may impose control measures suddenly, including movement restrictions such as quarantines.

Leaving Canada while in mandatory quarantine or isolation

No one should travel when sick. Commercial airline restrictions may also prevent you from boarding your plane if you're sick.

If you arrive in Canada and have started your 14-day mandatory quarantine or isolation period but then have to leave the country before this period ends, you must:

- continue to quarantine or isolate until you depart Canada
- wear a non-medical mask or face covering while around others
- get permission and follow the instructions laid out by a quarantine officer (for people in isolation only)

Avoid all travel on cruise ships outside Canada

Canada is **advising Canadian citizens and permanent residents to avoid all travel on cruise ships outside Canada** until further notice.

Cruise passengers include travellers from around the world who may be arriving from areas with known or unknown spread of COVID-19. The virus can spread quickly on board cruises due to the close contact between passengers. Older people and people with a weakened immune system or underlying medical conditions are at a higher risk of developing severe disease.

Cruise ship outbreaks of COVID-19 indicate that a large number of individuals onboard can become infected.

As the COVID-19 situation evolves, many countries outside of Canada have put policies and restrictions in place to contain the global outbreak. These restrictions may impact a cruise traveller's:

- itinerary
- ability to disembark
- access to health care

If an outbreak of COVID-19 occurs on your cruise ship while you are outside of Canada:

- you could be subject to quarantine procedures onboard ship or in a foreign country
- the range of consular services available to those on cruise ships may be significantly restricted by local authorities, especially in situations of quarantine
- you must quarantine for 14 days upon your return to Canada

The Government of Canada isn't planning additional repatriation flights to bring Canadians home during the COVID-19 pandemic. If an outbreak of COVID-19 occurs on your cruise ship while you're outside of Canada, our ability to help may be limited. Your options to return to Canada may also be limited due to decreased availability of flights.

For information on domestic cruises and passenger vessels, refer to the following:

- [COVID-19 measures, updates, and guidance for marine transportation issued by Transport Canada](#)

Non-medical masks or face coverings while travelling

All air travellers, with some exceptions, are required to wear a [non-medical mask or face covering](#) while travelling.

The following people should **not** wear a mask:

- children under 2 years old
- people who need help to remove a mask
- people who provide a medical certificate certifying that they're unable to wear a face mask for a medical reason

You may also be required to wear a non-medical mask or face covering on other modes of transportation that are federally regulated. Before you travel, check to see how [transportation measures](#) affect your plans and what you need to pack.

COVID-19 information for the transportation industry

Information for the transportation industry

Pandemics cannot be stopped by one level of government alone. They know no border and do not respect provincial /territorial lines. In a country like Canada, where responsibilities are divided, collaboration between all levels of government is key.

The Government of Canada is working with provinces, territories, industry, and communities to help prevent the spread of COVID-19 within the transportation industry and communities.

In early June, the Minister of Transport introduced new [measures for the use of face coverings in the Canadian transportation sector](#).

Many transportation workers are essential to deliver goods and get people from point A to point B. Public Safety Canada has developed [Guidance on Essential Services and Functions in Canada During the COVID-19 Pandemic](#), which identifies essential workers in transportation. Each province and territory also has its own [list of essential workers or businesses in transportation](#).

Aviation

Air operations in Canada

Canada is the world's third-largest aviation market, with 18 million km² of airspace managed by NAV CANADA. In 2018, 6.5 million aircraft movements took place at airports, 3.7 million of which were made by airlines. General aviation companies made the other 2.8 million, which were itinerant and local (other commercial, private and government).

Managing the onboarding process

Transport Canada issued [guidance for managing air travellers](#), including managing the onboarding process for flights departing from a Canadian [aerodrome](#), [U.S. transborder airports](#) and [international airports](#).

More information

- [Aviation measures taken in response to COVID-19](#)
- [Guidance for air operators and crew members and for managing ill persons aboard an aircraft](#).
- [Guidance to help employees determine when to wear face coverings at work](#).

Marine

Marine operations in Canada

The marine transportation sector provides a vital service to all Canadians in ensuring the safe movement of goods (food, medicine, supplies to health care sector, and other essential products) and people. It is also important for resupply and as a transportation link, playing a vital role for coastal and island communities.

Commercial shipping vessels and at ports

Canada's ports play a key role in the economy and international trade. The marine transportation sectors on the Pacific, Atlantic and Arctic coasts are prepared for the higher risks posed by COVID-19.

We have created a [poster](#) [PDF] and a [guide](#) [PDF] showing how the marine community can keep employees safe, while moving goods safely and efficiently through our ports.

We have also introduced these measures for marine industry workers:

- [Extension of Certification period of marine personnel certificates due to COVID-19.](#)
- [Mobility of asymptomatic workers in the marine sector](#), which includes:
 - crew change;
 - shore leave for seafarers, and
 - exemption from self-isolation requirements

In addition, [guidance is included to help employees determine when to wear face coverings at work.](#)

If a ship heading to Canada has a presumptive or confirmed case of COVID-19

Read the [Special Marine Security Notification Bulletin 2020-007 on COVID-19](#), which explains the responsibilities in these cases.

Also read [WHO Operational Considerations for Managing COVID-19 Cases/Outbreak on Board Ships](#)

Working at Transport Canada-owned public ports

Please see the [list of public ports owned by Transport Canada](#). Public ports are following the guidance of their local health authorities.

Canada Port Authorities

[Canada's Port Authorities](#) have also put measures in place. Please check with them for any procedures they put in place. Refer to the [guide on keeping marine workers safe at ports](#) [PDF].

Ferries and passenger vessels

We have introduced measures for cruise ships and other passenger vessels that:

- [prohibit cruise ships with overnight accommodations allowed to carry more than 100 persons are from operating in Canadian waters](#)
- [require all other passenger vessels to follow provincial, territorial, local and regional health authority requirements for timelines and processes to resume operations](#)
- [prohibit non-essential activities such as tourism or recreation on commercial vessels that have a capacity of more than twelve passengers](#)
- [prohibit or restrict vessels with the capacity to carry more than 12 passengers from entering or operating in certain Arctic coastal waters](#)

More information

- [Marine measures taken in response to COVID-19](#)
- [Guidance for ferries and essential passenger vessel operators.](#)

Rail

Railway operations in Canada

Canada's rail operations help sustain nearly every part of the Canadian economy, including our manufacturing, agricultural, natural resource, wholesale and retail sectors, transit, and tourism.

The passenger rail sector provides commuter, intercity and tourist transportation services. Passenger rail is either federally or provincially regulated.

Freight and passenger railway companies

Transport Canada has provided railway companies under federal jurisdiction [guidance on face covering for when physical distancing cannot be maintained or when local authorities require it](#). We strongly recommend that companies:

- make sure that workers have or have access to a personal face covering
- use a risk-based approach to decide which workers should wear the face covering, or when local authorities require it.

More information

- [Rail measures taken in response to COVID-19](#)
- [Guidance around Managing the Onboarding Process for federally-regulated Intercity passenger rail](#).

Road

Road operations in Canada

Road transportation is the dominant mode for moving both freight and passengers across Canada. Trucking is the primary form of freight transportation. Our country is linked from the Pacific to Atlantic coasts by a network of connecting highways anchored by the Trans-Canada Highway. Canada also has extensive road networks across its southern, more populated areas.

Keeping commercial drivers safe

Truck drivers move all of the essential products Canadians depend on, including all the medical and sanitation supplies to combat the spread of this virus. They also move emergency relief and food products, as well as materials used to manufacture and process essential goods, the fuels that move them, and a multitude of other items the supply chain depends on.

As an essential service, the trucking industry knows it's being counted on to make sure that goods are being safely transported. In line with this, the Canadian Trucking Alliance has issued a [Resource Document for the Canadian Trucking Industry \[PDF\]](#).

Transport Canada, in collaboration with PHAC and Employment and Social Development Canada, developed guidance to protect drivers and employees working in commercial vehicle operations: [Federal safety guidance to protect drivers and limit the spread of COVID-19 in commercial vehicle operations](#).

To help commercial vehicle drivers to choose and correctly use different types of personal protective equipment (PPE), we've also issued a guidance document: [Personal Protective Equipment and their Use by Commercial Drivers](#)

More information

- [Road measures taken in response to COVID-19](#)
- [guidance to help employees determine when to wear face coverings at work](#).

The [annex](#) provides an example of communication material that the CBSA is using to share information with its commercial and industry stakeholders during this time.

i Source: WCO/Canada Border Services Agency (CBSA)

31.03.2020

The World Health Organization declared the COVID-19 outbreak as a pandemic on March 11, 2020, prompting Canada to implement the following responsive measures:

- On March 16, 2020, Canada announced new restrictions to ban the entry of foreign nationals by air travel from all countries except the US. Canada also issued a customs notice for the relief of duty and tax for imported goods required for an emergency by Canadian health care centres and emergency responders.
- On March 19, 2020, the Canada Border Services Agency (CBSA) began providing a 45 business days grace period for imported goods requiring account declarations. The CBSA is suspending late accounting penalties released on minimum documentation from the period of 11 March to 14 May 2020. This grace period will be reviewed as the situation evolves.
- On 20 March 2020, Canada further announced restrictions to prohibit the entry of foreign nationals into Canada if they arrive from a foreign country other than the United States.
- On 20 March 2020, in collaboration with our U.S. partners, as a part of Canada's effort to prevent the spread of COVID-19 while safeguarding global supply chain continuity, Canada announced that, effective 21 March 2020, persons providing essential commercial services while in Canada (ex. truck drivers) as part of the global supply chain may enter Canada if they do not exhibit COVID-19 symptoms. Persons exhibiting COVID-19 symptoms are prohibited from entering Canada. Non-essential travel, including tourism, has also been prohibited.
- On 27 March 2020, Canada began allowing businesses to defer payments of the Goods and Services Tax / Harmonized Sales Tax amounts collected on their sales, as well as customs duties owing to their imports until 30 June 2020. Importers must still submit accounting declarations within the required timelines.

While these important initiatives will serve to curtail the spread of the COVID-19 pandemic, Canada is particularly mindful of the need to maintain coordinated regional and international action to ensure the integrity of global trade supply chains.

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars in daily cross-border trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people to exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries. These supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.
