Restrictions

On 13 March, the Prime Minister of Poland announced a “state of emergency”. In addition to measures to limit public gatherings, the government announced that border controls will be temporarily restored from 15 March (00:00) for 10 days (renewable). During this period:

- Foreigners will not be allowed to enter Polish national territory. All air traffic and train movements coming from abroad will be temporarily suspended.
- Polish citizens and foreigners working in Poland that are returning from abroad must undergo a two week quarantine period.
- National bus, air and rail transport will operate normally.
- International road freight transport is not included in these restrictions. Borders remain open to the flow of goods and truck drivers operating international road freight will not have to comply with the two week quarantine period. The list of border crossing points open during this period is available here.

On 19 March, the Polish Minister of Health lifted the previous duty of fulfillment of driver localisation forms. In addition, according to information on the Border Guard website, quarantine is not imposed on:

- people living in Poland who work in a neighbouring country and who regularly cross the border (cross border workers).
- foreigners living in a neighbouring country who work in Poland and cross the border regularly (cross border workers).
- drivers engaged in the professional transport of goods and passengers.

Health checks are still taking place at border crossing points. Drivers with a temperature of above 38 degrees will automatically undergo a medical examination and will not be able to continue driving.
