Information based on the recommendations of the Public Health Agency is spread throughout the organisation on a regular basis. This include to stay at home if you have any symptoms and to wash your hands with soap and water regularly. Employees that have duties that can be done from home are to work from home. Swedish Customs has taken measures to ensure that there is adequate protective equipment for customs officers in stock, should the situation require the use of such equipment. Information about new regulations and possible regulatory initiatives has been communicated to customs officers, and the internal guidelines regarding the correct use of protective equipment has been updated. All business travels are to be cancelled/postponed except for those essential (which is to be decided by management).

So far, Swedish Customs has not encountered any unexpected challenges, the organization is adjusting to the new situation and we have crisis teams at both national and regional level that coordinate the work. Neither are we experiencing any disruptions caused by shortage in personnel, due to sick leave, so far.
