**Special Quarantine Regime has been mitigated**

---

---

**Explanation of the Resolution of the Cabinet of Ministers No. 280**

<https://nk.gov.az/az/document/5581/>

Taking into account the increase in the number of vaccinated citizens in the country, and the steady decline in the dynamics of infections, it is decided to apply the next phase of mitigation measures within the special quarantine regime.

According to the decision of the Task Force under the Cabinet of Ministers, from October 1, 2021, the restriction on the suspension of public transport on weekends, as well as the Baku Metro, will be lifted.

Furthermore, it is decided to resume the activities of the following areas of work and services from October 1, 2021:

- activities of recreation and entertainment venues (including clubs), as well as children's entertainment venues (including those in boulevards and parks);
- activities of cultural facilities (including concert halls), as well as conference halls, cinemas, theaters, provided that they do not exceed 50% of their total capacity;
- Activities of children's and other entertainment centers inside large shopping centers, as well as cinemas with a total capacity of not more than 50 percent.

The restored work and service areas are allowed to remain open until 00:00. For people over 18 years of age, services provided in the closed areas of such work and service facilities can be accessed only if they have a COVID-19 passport. Individuals who are unable to get vaccinated for certain reasons may enter these areas where COVID-19 passport is required by obtaining COVID-19 Vaccine Contraindication Certificate.

Eighty percent of the workforce in these areas must have a COVID-19 passport (COVID-19 vaccination certificate or COVID-19 immunity certificate).

In addition, taking into account the fact that long-term indoor gatherings create favorable conditions for the spread of coronavirus infection, a decision has been made with regards to carry out regular intercity passenger transport between cities and regions in order to reduce the risk of human transmission of COVID-19.

According to the decision, except for regular passenger traffic between Baku and Sumgayit, Absheron region, except for persons under 18 years of age, when carrying out regular passenger transport by rail and road (except for passengers transported by taxi) from cities and regions of the country, passengers are required to get the first dose of vaccination against COVID-19 from October 1, 2021, and the second dose from November 1, 2021 respectively, or to have a certificate of immunity against COVID-19.

Verification of COVID-19 passports will be carried out through a special mobile application ("Check App"). The application was created by State Agency for Public Service and Social Innovations under the President of the Republic of Azerbaijan and has been used since September 1<sup>st</sup> in all places where COVID-19 passport is required.

Appropriate control measures will be continued to ensure compliance with general rules such as the use of personal respiratory protection, social distancing and hand hygiene, as well as other applicable requirements. In case of violation of these laws, individuals and legal entities will be held accountable by the Code of Administrative Offenses of the Republic of Azerbaijan.

The owner of the premise is considered directly responsible for the violations in the organization and implementation the process of verification of COVID-19 passports in the premises operating in the areas of work and services where COVID-19 passport is required.

"As it is known, one of the measures taken to prevent the spread of the coronavirus (COVID-19) pandemic in the territory of the Republic of Azerbaijan is to allow foreign citizens to enter the territory of the Republic only with the special permission of the Task Force under the Cabinet of Ministers.

Considering large-scale measures taken over the past year, including a successful vaccination program launched in January 2021, the epidemiological situation in Azerbaijan has improved, a number of restrictions imposed under the special quarantine regime have been removed.

Currently, the epidemiological situation is stabilizing in a number of countries around the world, and as a result of consistent vaccination measures, infections in those countries are getting under control.

In this regard, the Task Force under the Cabinet of Ministers of the Republic of Azerbaijan has adopted a Resolution to abolish the requirement for special permits step by step for citizens of several countries with stable epidemiological situation to visit the country.

Therefore, starting from June 10<sup>th</sup>, taking into consideration the positive dynamics in the epidemiological situation, citizens of the Russian Federation and the Republic of Turkey will be able to travel to Azerbaijan by air under the following conditions:

COVID passports and PCR test results will not be required for children under the age of 1 year.

All airlines operating direct flights to the Republic of Azerbaijan must only register those passengers who meet the relevant requirements. Passengers who do not meet the requirements while crossing the border to the territory of Azerbaijan will not be allowed to enter the country at the entrance and will be returned by the same aircraft at the expense of the carrier.

**Information from the Task Force under the Cabinet of Ministers**

A drastic rise of COVID-19 virus infection cases around the world, including Azerbaijan and the latest days' statistical data, in particular, have made it necessary to make some changes to the special quarantine regime rules.

Due to the repeal of limitations imposed on entrepreneurial activities, persons employed in work places and service areas that have the permit to operate, are engaged in working activities in full volumes. In its turn, it results by overloading of public transport, creates problems in observing quarantine rules in working places and causes the density inside trade and service facilities.

With a view to the current situation, the Task Force under the Cabinet of Ministers recommends following to the enterprises operating in private sector:

- To employ necessary staff members in limited numbers and ensure to the maximum the distant work of other staff members;
- Except very necessary cases, employees aged over 65 should not be employed temporarily while retaining their salaries.
