Scope

The project's initial activity will be to identify support for or against the creation of a Model Law for PPP/Concessions and its ability to promote People First Public Private Partnerships in furtherance of the United Nations Sustainable Development Goals. Members of the team are invited to put forward their views on this question at the earliest opportunity.

The second, substantive activity will be the drafting of a coherent, wide-ranging, Model Law for PPP/Concessions. Various publications in the past (e.g. the UNCITRAL guides) have provided guidance as to the areas such laws should address, the advantages and pitfalls of different types of clause, and the issues affecting them. However, a systematic review of existing approaches and proven precedents, compiled and reflected in a single model concessions law, has not been undertaken outside the CIS countries (where a new 'CIS Model Law' of this kind has recently been developed) . Nor have any efforts to date focused on furthering the UN Sustainable Development Goals. The aim of the project would therefore be to draw up the provisions themselves, setting out a reasonably complete set of precedent clauses and a supporting implementation commentary, based on a compilation and synthesis of empirical evidence, and focused on the achievement of the UN Sustainable Development Goals.
