

## ITF/UNECE Informal Mobility Group

This page collates resources for the ITF and UNECE group on new mobility monitoring.

The aim of the series of meetings is to:

1. **Provide a platform** for interested countries to exchange on critical issues they are facing during this covid crisis;
2. **Discuss methodologies** and joint approaches to the use of “fast indicators” to ensure their comparability across countries;
3. **Develop strategies** for new methods of data production, considering obtaining data from private sources, ensuring sustainability of production, and considering ways to measure the quality and accuracy of any new statistical outputs;
4. **Collate available information** in a single place for countries to use as they wish.

These webinars came about due to increased interest in more timely data from new data sources as a result of COVID-19 lockdowns. These data sources were already on the horizon, but in 2020 their prominence has increased significantly. ITF and UNECE therefore want to help countries learn from each other, by sharing experiences.

### 2nd Meeting, Tuesday 26th January 2021

#### Presentations

- Statistics Canada: [Towards a Real Time Business Conditions Index](#).
- Chile Ministry of Transport and Communications: [Urban Mobility Patterns Using Big Data](#).
- Ramboll Finland: [Using Mobility Data Provided by Mobile Network Operators in Transport and Urban Planning](#).

### 1st Meeting, Wednesday 16th September 2020

#### Presentations

- European Commission Joint Research Centre: [Mobility Data to inform the COVID-19 crisis response at EU scale](#).
- Statistics Slovenia: [Lessons learned](#) from the collecting of data on mobility with the mobile app, from automatic traffic sensors data and from data obtained from the MNOs for tourism and/or transport statistics purposes. *(some slides containing unreleased data have been removed; they may be available in the future).*
- German Federal Office for Goods Transport: [German Truck Toll Mileage Index](#).
- Positium: [Recent lessons and developments with Mobile Positioning Data](#).

### Earlier Meetings

[ITF Meeting \(online\) 4th June 2020](#). two hour online meeting in lieu of the annual ITF statistics meeting.

[UNECE Working Party on Transport Statistics \(informal and virtual meeting\) 17th-19th June 2020](#) An informal and online session of the UNECE annual Working Party.
