

## Article 3.36 - Additional marking for vessels used for underwater diving

[French](#) | [Russian](#)

1. A [vessel](#) being used for underwater diving shall carry, in addition to the marking prescribed elsewhere in these regulations:

A rigid reproduction at least 1 m high of the "A" flag of the International Code of Signals, in a suitable position and high enough to be visible from all directions by [night](#) and [day](#).

2. Where appropriate, such vessels may carry the marking referred to in [article 3.34](#), paragraph 1, instead of the marking prescribed in paragraph 1 above.
